- 1/8" DRILL BIT
- PHILIPS BIT
- 50/50 ALCOHOL/WATER MIX
- 320 -- 400 GRIT SANDPAPER
- DRUM SANDER
- FILE
- POP RIVET GUN

PAINTING

For the best results, the surface must be free of grease or oils using the same careful preparation you would use to paint the vehicle. CAUTION: Exposure to harsh solvents such as Acetone, Lacer thinner, and some adhesive removers can do extensive damage to this product; therefore, we recommend Isopropyl alcohol for wiping down the parts. Your local paint supplier is the best consultant for choosing a coating for this product. In many cases, the same paint may be used on both the van and the GROUND EFFECTS. Check compatibility of your system and our super high impact ABS plastic with your paint supplier.

-----IMPORTANT-----

Modifying or removing metal from a vehicle may set aside the original equipment manufacturer's warranty and liability; and may affect Federal Motor Vehicle Safety Standards for the model. Refer to the vehicle manufacturers van conversion guidelines prior to making alterations to the vehicle body and construction.

All statements, technical information, and suggestions contained herein are based on data we believe to be reliable, but the accuracy or completeness thereof is not guaranteed. Nothing herein shall constitute a warranty, either expressed or implied. It is the users responsibility to determine the suitability for his own use of the products manufactured by Viking Formed Components or any of its subsidiary

PREPARATION

companies. The user assumes all risk and liability for the application of this product.

STORAGE

Store unpainted parts in an area protected from sunlight and weathering. As with bare steel, oxidation occurs until exposed surfaces are painted.

BEFORE INSTALLATION

CAUTION: Installation of GROUND EFFECTS should not be attempted until vehicle, parts and shop area are at least 70°F. This will provide the conditions necessary for maximum tape adhesion.

- 1) Remove dirt and grime from lower third of vehicle.
- 2) Wipe same area with (50/50) Alcohol/water mix and allow area to dry before installing parts.
- 3) Find the license plate screw inserts (usually found in a plastic bag in the chassis or included with the kit hardware) and insert them into the holes in the front or rear bumper.
- 4) Make underside of van safely accessible by use of a ramp or fail-safe lift.

YOU ARE NOW READY TO INSTALL
